SER 402 Sponsor Meeting Minutes

Date November 5, 2026

Time 2:45 p.m. MST - 19 minutes

Attendees Matthew Edlin, Colin Tugend, Jair Franco (async*) and Dr. Robert Heinrichs (project sponsor)

Topics Covered

Linking incident uploads to riders. Riders should see their own incidents on the website, and administrators should see all incidents and photos. Dr. Heinrichs proposed sending a phone identifier with each Protobuf request. Riders could copy the identifier from app settings into their web profile. The app and server teams still need to agree on the approach. A server-issued access token and a shared login were also discussed.

Choosing incident photos. Matthew reported that text recognition had improved, but signs and multiple plates could mix unrelated text together. The sponsor supported flagging photos containing both a vehicle and text so riders can review those first. Character case and length were suggested as clues for identifying possible plates.

Estimating incident locations. Colin is using the incident time offset and nearby GPS readings to estimate location. The calculation depends on how close the nearest reading is to the incident. Christopher is assessing how many readings are needed for sufficient accuracy.

Tutorial and handoff. The sponsor supported trying a first-use tutorial that riders can skip and reopen from Settings. The team will review it before deciding whether to include it. For handoff, the sponsor requested one documented branch containing stable features. Experimental features can remain on separate branches.

Action Item List

Action item	Owner	Target due date
Agree on a minimal way to link incident uploads to web accounts.	App and server teams	Nov. 10, 2026
Test combined text and vehicle cues on photos with signs or multiple plates.	Matthew Edlin	Nov. 13, 2026
Refine the estimate for incidents between GPS readings.	Colin Tugend	Nov. 17, 2026
Evaluate the GPS sampling needed for sufficient accuracy.	Christopher	Nov. 12, 2026
Review remaining work and decide what to merge and document for handoff.	App team	Nov. 19, 2026

Next Meeting

Thursday, November 19, 2026 • Time 2 pm (MST)

*Jair was there at the original time when the meeting started originally at 2pm. The sponsor was late and we were unsure they were coming at first. Ultimately, we were able to have the meeting with a late start, but not everyone could rejoin. Jair did post his questions and statements to Slack, and they were relayed to the sponsor.
